--- SEE OFFICE ACTION ON THE FOLLOWING PAGES ---

Art Unit: 2662

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,6-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Yoshida.

Yoshida discloses a bridge which is used for interconnecting local area network comprising a packet header for use in information packets transmitted within a computer network comprising a protocol extension field that indicates changes of field values and/or lengths within the header (21 of fig. 2; lines 38-39, col. 3)

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2-5,9-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yoshida.

Art Unit: 2662

Yoshida disclose all the claimed subject matter as described in previous paragraph except that the extension field of Yoshida use 2 bits. However, using 2 bits which represent four combination have been obvious to one skilled in the art since it consider to be the design choice.
